

Covered period
01. Jan 2024 - 15. Oct 2024

Comparison period
01. Jan 2023 - 15. Oct 2023

Summary

	Covered Period	Comparison Period	% Change
Total interactions	6	3	100.0%
Total time spent	5.05 h	0.20 h	2425.0%

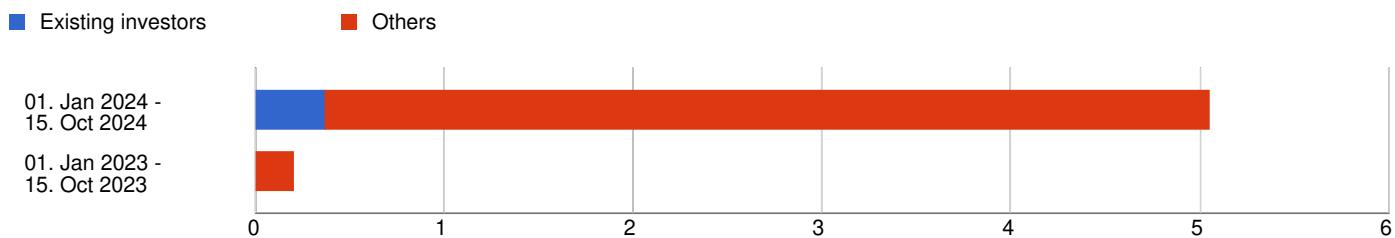

Summary figures apply a company perspective (not individual representatives) i.e. if two internal participants together attended one 60min group meeting with two investors then it will be counted as two interactions, 60min spent. The 60min spent are allocated 30min each to the two participating investors.

Details

Total interaction shareholders/prospects

	Covered Period	Comparison Period	% Change
Existing investors	0.37 h, 7.3% of total	0.00 h, 0.0% of total	-
Others	4.68 h, 92.7% of total	0.20 h, 100.0% of total	2241.7%

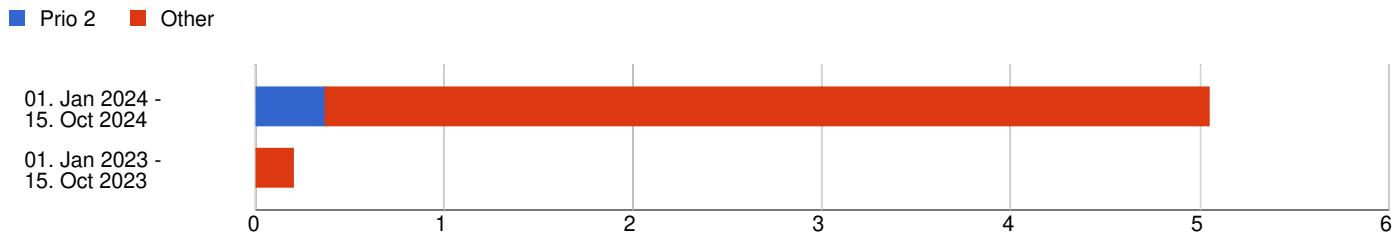

No double counting involved. Existing investors means investors associated with an investment company that owned shares at the moment of the meeting. Others did not own shares.

Total time spent by Prio tags

	Covered Period	Comparison Period	% Change
Prio 2	0.37 h, 7.3% of total	0.00 h, 0.0% of total	-
Other	4.68 h, 92.7% of total	0.20 h, 100.0% of total	2241.7%

No double counting involved. The cumulated interactions/time spent will be the same figure as in the summary.

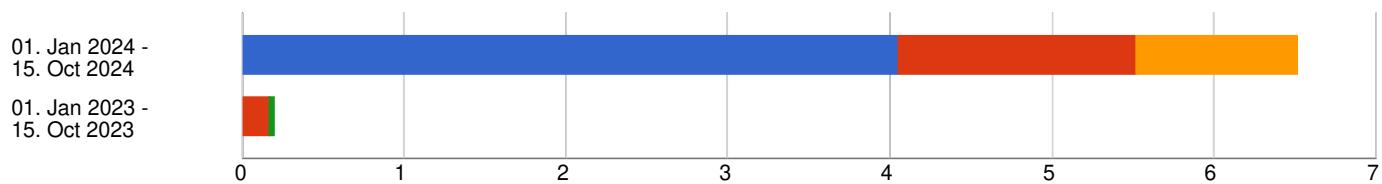

Total time spent by internal participant

	Covered Period	Comparison Period	% Change
Alina Superadmin	4.05 h, 80.2% of total	0.00 h, 0.0% of total	-
Alina Admin	1.47 h, 29.0% of total	0.17 h, 83.3% of total	780.0%
Rafael Wehner	1.00 h, 19.8% of total	0.00 h, 0.0% of total	-
schedulR Admin	0.00 h, 0.0% of total	0.03 h, 16.7% of total	0.0%
Total internal participants	6.52 h, 129.0% of total	0.20 h, 100.0% of total	3158.3%

This table contains double counting, i.e. if two internal participants attended the same 60min meeting with two participating investors it will be logged here as four interactions (two interactions for each internal participant) and 120m time spent (60min for each internal participant). This means the sum of this table will be most likely higher than the summary figure. However, it correctly displays the interactions/time spent per internal participant. If an internal participant has a 100% here, it means she participated in every single investor interaction during the period. Also, if total internal participants attended e.g. 150% of interactions/time spent it means that on average 1.5 internal participants attended each meeting.
